

Axaform - New Podium & Stairway Safety Platform system

- work efficiently on tasks at height with this mobile unit

Mobile Podium

Expands in width

Fit longer legs and the Podium transforms into this stairwell platform

Axaform erected on a staircase

Axaform is a strong podium on castors; it is wheeled into position for work; the castors retract automatically when a person steps on to the podium and no wheel locks have to be operated. The podium is telescopic; open it out to work, without interruptions to move it too often. Close it up for awkward places; storage & transport

Axaform provides a complete safety platform system for many types of work in a house, such as plastering, decorating, and electrical maintenance
